

# Assessing PPE Use in a Child Care Setting

According to the Ministry of Education guidance, all adults in a child care setting are required to wear medical masks while inside the child care premises, including the hallways and staff rooms (unless eating). Eye protection is required for individuals working in close contact with children who are not wearing face protection (children younger than grade 1). This algorithm is intended to be used by child care personnel to assess level of risk and to guide their use of Personal Protective Equipment (PPE).

Refer to Recommended Steps for Putting On and Taking Off PPE.
