

Who is a Close Contact?

Consider the following factors when identifying people who are your high risk close contacts:

- Within 2 metres of each other for more than a few minutes, or a cumulative 15 minutes during the day, and not being separated by a physical barrier, or both are not wearing a well fitted medical mask.
- In a small room that was not well ventilated, e.g. door closed, with several people, even with all wearing a well fitted mask, or when people were exercising, talking loudly, singing, or yelling, even if they are all wearing a mask.

Close contact

You were within 2 metres (6 feet) for 15 minutes or more without masks.

You had multiple close interactions with someone during the day (even if it was less than 15 minutes) and for part of that time you did not wear a mask.

You had close physical contact with the person, such as a hug with or without a mask.

You live or care for someone in the same home who has COVID-19 symptoms.

Not a close contact

You had brief interaction while wearing a mask and/or with a barrier in place.

You passed someone quickly.

You greeted someone and kept your distance.

You made a delivery to someone who was self-isolating but had no contact with them.
