Ontario Ministry of Health

Corrective measure(s) required:

1. Cease the reprocessing of body piercing equipment and jewelry.
2. Do not use any equipment that has been reprocessed and is at your home location.
3. Remove all reusable critical items (equipment and jewelry) from LUX Tattoo and do not use.
4. Use only single-use disposable, pre-sterilized critical items in order to continue providing service.
5. Provide the Health Unit with copies of all client records from the first day of services provided to today.
6. Provide the Health Unit with copies of all sterilization logs and machine print outs dated from the initial use of autoclave to today.

IPAC Lapse Disclosure Form
