

Your Child had Symptoms While at Child Care

During the day, your child presented with symptoms. As a precaution, your child was separated from other children and monitored by a staff member until you were able to bring them home. This action was carefully explained to your child.

What Should You Do Now?

- If your child is experiencing the symptoms most commonly associated with COVID-19, household members* do not need to isolate if any of the following apply:
 - » They have previously tested positive for COVID-19 in the past 90 days
 - » They are 18 + and boosted
 - » They are under 18 years old and are fully vaccinated
- To help guide you, complete the COVID-19 Screening Tool with your child:
 - <https://covid-19.ontario.ca/school-screening/>
- If you have questions call your health care provider or your local public health unit:
 - Leeds, Grenville & Lanark District Health Unit: 1-800-660-5853
- Inform the child care setting to let them know about the next steps from the COVID-19 School Screening Tool and if your child can return.

* All household members must monitor for symptoms, wear a mask outside the home, avoid activities that require mask removal in public (like dining out or high contact sports), and avoid visiting high risk settings or anyone vulnerable for 10 full days from the date of their last exposure. Distancing is encouraged when masks are removed to eat in a school or child care setting.
